

Colorectal Cancer Screening for ZIP XXXXX

Confidential Report for Your Organization

How is colorectal cancer screening measured?

This measure reports the percentage of adults, aged 50-75, who receive primary care from a Wisconsin Collaborative for Healthcare Quality (WCHQ) member health system, and received a screening for colorectal cancer. This could include a colonoscopy within the 10-year measurement period, a CT colonography or flexible sigmoidoscopy within the 5-year measurement period, or a stool test within the 1-year measurement period.

Who had a colorectal cancer screening?

3,000 people are estimated to live in this ZIP that are eligible for this measure.¹

1,500 (50%) of the 3,000 people estimated to live in this ZIP are in this report.

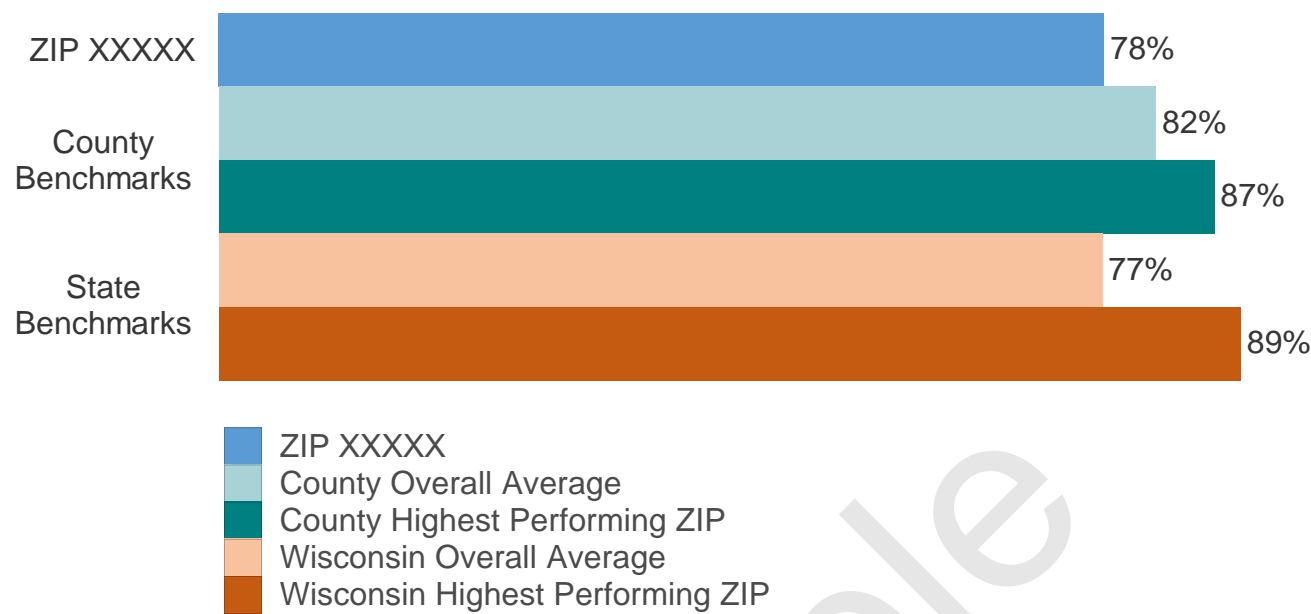

1,170 (78%) of the 1,500 people in this report had a colorectal cancer screening as of Dec 2018.

Why does it matter?

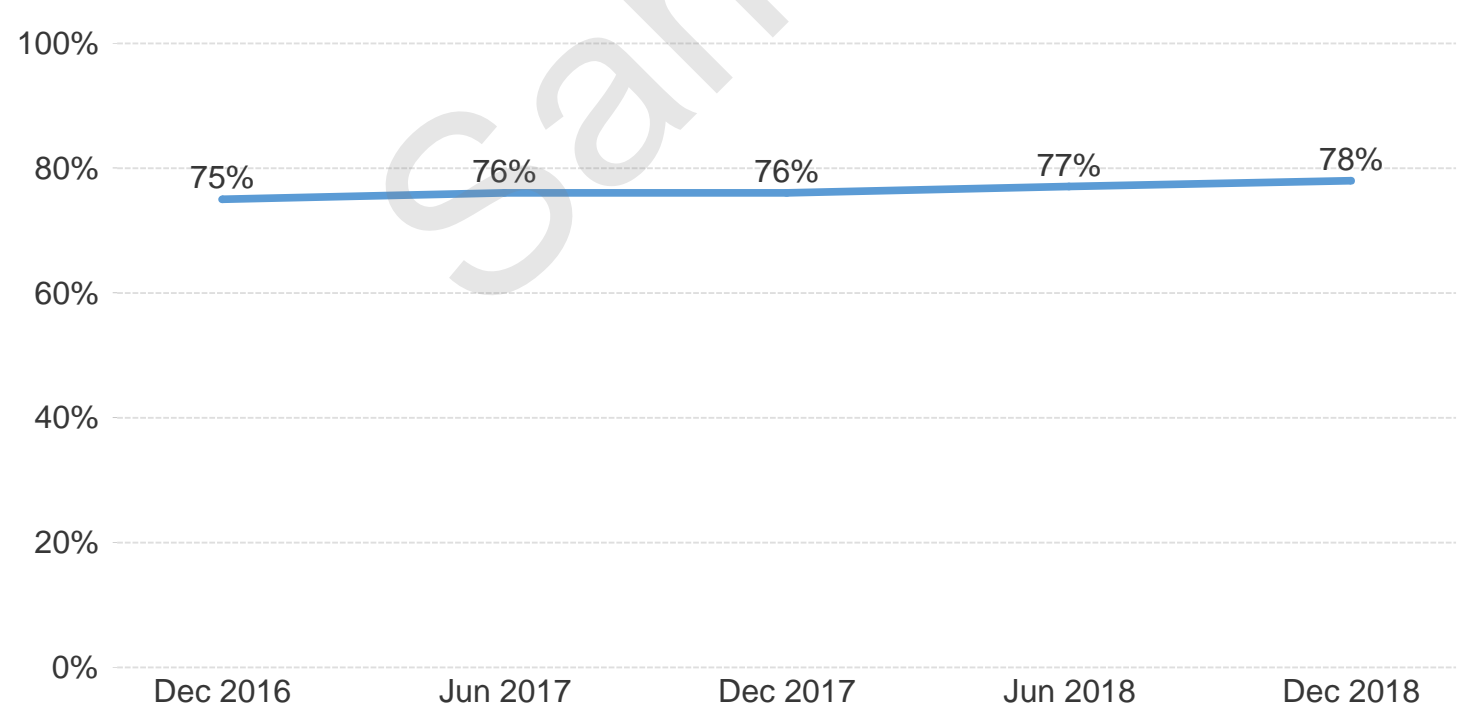

Screening tests help find abnormal growths so they can be removed before they turn into cancer. Screening also helps find cancer at an early stage, when treatment works best.²

Who lives in this ZIP?

Learning about the people who live in a neighborhood can help you understand the health needs of the community. This section provides information about the people included in this report and how they compare to overall population estimates from the American Community Survey (ACS). The most recent ACS population of this ZIP is 9,000.

% Female

Report
51%
ACS
48%

Females tend to live longer and have fewer chronic illnesses.

% Age 65 and Over

Report
30%
ACS
25%

Risk for many diseases increases with age.

% Uninsured

Report
1%
ACS
3%

Health insurance promotes improved health.

Race/Ethnicity

Report

ACS

People from racial and ethnic minority groups may experience physical, economic & work, service, and social environments that lead to poorer health outcomes.

What else impacts health in this neighborhood?

The living conditions of a neighborhood shape health more than healthcare alone. To understand the causes of poor health in a ZIP, consider:

1. Have current or past policies reinforced systemic racism and/or income inequality in the neighborhood? Think across key sectors like business, education, and criminal justice.
2. Do all residents have a fair chance to make a livable wage?
3. Do all residents have access to safe, affordable housing?
4. Are all residents able to receive quality medical care? What barriers may be preventing this?
5. Do all residents have convenient access to nutritious food options?
