

Childhood Vaccinations for ZIP ;;;;;

Who lives in this ZIP?

Learning about the people who live in a neighborhood can help you understand the health needs of the community. This section provides information about the people included in this report and how they compare to overall population estimates from the American Community Survey (ACS). The most recent ACS population of this ZIP is 25,000.

% Female

Report %
ACS 50%

Females tend to live longer and have fewer chronic illnesses.

% Age 65 and Over

Report 0%
ACS 18%

Risk for many diseases increases with age.

% Uninsured

Report %
ACS 5%

Health insurance promotes improved health.

Race/Ethnicity

Report

ACS

People from racial and ethnic minority groups may experience physical, economic & work, service, and social environments that lead to poorer health outcomes.

What else impacts health in this neighborhood?

The living conditions of a neighborhood shape health more than healthcare alone. To understand the causes of poor health in a ZIP, consider:

1. Have current or past policies reinforced systemic racism and/or income inequality in the neighborhood? Think across key sectors like business, education, and criminal justice.
2. Do all residents have a fair chance to make a livable wage?
3. Do all residents have access to safe, affordable housing?
4. Are all residents able to receive quality medical care? What barriers may be preventing this?
5. Do all residents have convenient access to nutritious food options?
